**Note:** \* The CAS No. mentioned in the provided formula and the documents of the raw materials were entered in the table above. The marked CAS No. (\*\*) do not correspond with the CAS No. assigned to the specific ingredients in CosIng. For the cases that the CAS No. are not mentioned in the provided formula/documents or they do not match with the ones assigned to those ingredients in CosIng, the latter - where available - have been entered in the table above (CAS No. in brackets).

**PURE CONDITIONER 45ML**  
(CD1-1634)  
**MING FAI INDUSTRIAL CO., LTD.**

---

---

**2. PHYSICAL/CHEMICAL CHARACTERISTICS AND STABILITY OF THE COSMETIC PRODUCT**

---

- Supplier's specifications for each raw material have been reviewed (Safety and Technical Data Sheets, MSDS and TDS).
- Specifications of Final Product: Have been reviewed.

|             |  |
|-------------|--|
| Appearance: | Opaque Viscous Emulsion                |
| Color:      | Yellow                                 |
| Odor:       | Characteristic                         |
| pH:         | 4.50 - 5.50 (25 °C)                    |
| Viscosity:  | 4000 - 7000 mPa·s (25 °C, LVT#4@30RPM) |

- Stability of The Product: Has been reviewed (manufacturer).

**3. MICROBIOLOGICAL QUALITY**

---

Microbiological Quality: The product, due to the presence of preservatives in the formula (e.g. Methylchloroisothiazolinone and Methylisothiazolinone) is unlikely to present, under normal production conditions, any kind of bio burden.

Challenge Test: The test has been performed (QACS Ltd.) according to the current EUROPEAN PHARMACOPOEIA.

Each strain mentioned below, has been studied separately: Ps. Aeruginosa ATCC 9027, St. Aureus ATCC 6538, E. Coli ATCC 8739, C. Albicans ATCC 10231, A. Brasiliensis ATCC 16404.

Results are satisfactory.

**4. IMPURITIES, TRACES, INFORMATION ABOUT THE PACKAGING MATERIAL**

---

- Regarding any traces and impurities from the raw materials please refer to Table I of section 1 Quantitative and qualitative composition of the cosmetic product and section 8. Toxicological Profile of the Substances.
- Properties of Packaging Material: According to the presentation and the formula of the product, package is considered unlikely to affect its purity and stability.

Type of packaging materials: Bottle: PET (EastPET™ A12)\*. Cap: PP.

\* The manufacturer of the PET material declares that that material is suitable for food contact applications.

# PURE CONDITIONER 45ML

(CD1-1634)

## MING FAI INDUSTRIAL CO., LTD.

---

- Production Method: Has been reviewed.
- G.M.P. Compliance:  
Certification Body: INTERTEK. Certification Number: SZ1507C2 - Date of Issue: Dec 11, 2015. Date of Renewal: July 26, 2018.

### 5. NORMAL AND REASONABLY FORESEEABLE USE

---

The product is applied on the hair and it is rinsed off. External use only.

### 6. EXPOSURE TO THE COSMETIC PRODUCT

---

The product is applied on the hair and it is rinsed off so taking under consideration the SCCS/1564/15 opinion it can be studied toxicologically as a hair conditioner (hair care) with an estimated daily amount applied 3.92 g and a calculated relative daily exposure 0.60 mg/Kg bw/day.

Target Group for Use: Adults

### 7. EXPOSURE TO THE SUBSTANCES

---

Please refer to Table I of section 1. 1. Quantitative and qualitative composition of the cosmetic product

### 8. TOXICOLOGICAL PROFILE OF THE SUBSTANCES

---

- The product itself has not been tested on animals (Article 18).

#### MSDS TOXICOLOGICAL REVIEW:

**Respiratory** : Not required for consumer use of this product. Inhalation exposure is not applicable for this type of product.

**Skin** : This product is unlikely to be sensitizing to human skin. It is not expected to produce allergy by skin contact, except the cases of people with known allergic reaction in the specific allergens referred on the label. The absorption through the skin is considered limited.

**Eye** : As with any material contacting the eye its accidental exposure may result in slight eye irritation.

**Ingestion** : Although some ingredients used in the manufacture of this product are considered hazardous on an individual basis, the final formulation of this product is considered non-hazardous, under foreseeable use.

All information available refers to the relevant MSDS of each raw material that takes part in the formula of the product. The specific ingredients that have been chosen for the production of this product have been used for years, for same

## PURE CONDITIONER 45ML

(CD1-1634)

# MING FAI INDUSTRIAL CO., LTD.

---

products, without any known toxicity problems, under foreseeable conditions of use.

- Especially for 'hazardous' raw materials (substances under restrictions listed in the Annexes i.e. Annex II-Substances Prohibited in Cosmetic Products, Annex III-Substances Which Cosmetic Products Must Not Contain Except Subject to the Restrictions, Annex IV-Colorants Allowed, Annex V-Preservatives Allowed and Annex VI-UV Filters Allowed ) there are already limits in legislation.

- There are no data for evaluation in the product of any impurities of the substances and raw material used.

- There is no evidence from the formula of the product for interaction of substances.

- It contains the permissible colorants **CI 19140** and **CI 14700** which are allowed for use in cosmetics in the EU according to the REGULATION (EC) No 1223/2009. The producer must ensure that every batch of those colorants used for the production of this product is in conformity with EU legislation. Cosmetic colorants must pass purity criteria as set out in Commission Directive 95/45/EC (and its subsequent legislative replacements) or specific purity criteria as set by REGULATION (EC) No 1223/2009 (see ANNEX IV - LIST OF COLORANTS ALLOWED IN COSMETIC PRODUCTS), where applicable.

- There are known plant-derived raw materials (e.g. extracts, oils, waxes, etc.) directly added in the formula.

- It may contain Methyl Salicylate (*Cananga Odorata*, *Eugenia Caryophyllus*). Taking into account data on hepatotoxicity, the toxic effect on reproduction, the ability to cause severe malformation in the unborn, the ability to irritate skin and mucous membranes and the skin penetration, the concentration of methyl salicylate in plant extract should be limited in order to not to exceed 2% in finished cosmetic products. Due to irritation potential when combined with ethanol the maximum authorised concentration in products high in that vehicle should not exceed 0.4%. Methyl salicylate should be forbidden in products near the eyes. Further data on mutagenicity (in vivo) and photo toxicity should be provided. (Plants in cosmetics - Potentially harmful components - Volume III - prepared by the Committee of Experts on Cosmetic Products).

- It may contain Eucalyptol (*Elettaria Cardamomum*). The Council of Europe Committee of experts on flavouring substances was of the opinion that the toxicological data on eucalyptol were too limited and not of an optimal quality, in order to set a TDI. For a more precise risk characterisation, further data on metabolism, skin toxicity, skin penetration, effects on mucous membranes and a 28-day oral study would be needed. A limited and harmonised concentration of eucalyptol in cosmetic products has to be set. A ban of the use of eucalyptol in cosmetic products for children below the age of 3 years is recommended. (Plants in cosmetics - Potentially harmful components - Volume III - prepared by the Committee of Experts on Cosmetic Products).

## PURE CONDITIONER 45ML

(CD1-1634)

# MING FAI INDUSTRIAL CO., LTD.

---

- The product contains polyacrylamides (Polyquaternium-7) and, according to the Regulation (EC) No 1223/2009 and the SCCP opinion 0011/98, the maximum residual acrylamide content in the final product must be 0.5mg/kg. The manufacturer of the raw material suggests/guarantees that the maximum residual acrylamide content in the raw material is such so that the final product fulfils this restriction.

- Based on current Cosmetic legislation 1223/2009, MoS must be calculated for every ingredient according to the relevant NOAEL.

For ingredients without NO(A)EL values and total lack of safety reference, the calculation below is a 'worst case approach', where, taking under consideration the pure maximum concentrated material of the formula, the minimum NO(A)EL (oral) is calculated, according to the Estimated daily exposure (A) of the product (§ 1.6).

In this way 'dangerous' ingredients are considered only those with 'hypothetical' NO(A)EL values lower than the minimum NO(A)EL calculated value and concentrations, even not greater than the pure maximum concentrated material, but able to result (under Safety calculation) in MoS<100.

The combination above is statistically difficult to yield in MoS<100 as:

1. The existence in calculations of the maximum concentrated material of the formula (without NOAEL), minimizes the possibilities of any other material to be so potent (in view of a NO(A)EL value),
2. In this approach the calculation of the minimum NO(A)EL, is usually lower than 1000 mg/Kg bw/day, depending on the type of the product. The minimum NO(A)EL values at these levels can be found only in ingredients like biocides/preservatives (i.e. Phenoxyethanol 500 mg/Kg bw/day or Methyl Paraben 1000 mg/Kg bw/day (SCCP/0125/99 & SCCP/0873/05 respectively).
3. Ingredients with low NO(A)EL values (<1000 mg/Kg bw/day) are very well defined in toxicological literature and there are exact data that have already been taken into consideration for calculation of the relevant MoS.

**PURE CONDITIONER 45ML**  
(CD1-1634)  
**MING FAI INDUSTRIAL CO., LTD.**

---

---

Calculation of the 'Worst Case Approach':

**MoS**= NO(A)EL / SED > 100, With:

**SED** (mg/kg bw/day) = Systemic Exposure Dosage

**A** (mg/kg bw/day) = Estimated daily exposure to a cosmetic product per kg body weight, based upon the amount applied and the frequency of application (**0.60**).

**C** (%) = the Concentration of the ingredient under study in the finished cosmetic product on the application site (here **Polyquaternium-37 0.6%**),

**D<sub>Ap</sub>** (%) = Dermal Absorption expressed as a percentage of the test dose assumed to be applied in real-life conditions (**100%**).

**SED** = **A** (mg/kg bw/day) x **C** (%) / 100 x **D<sub>Ap</sub>** (%) / 100 = 0.60 x 0.6 / 100 x 1 = 0.0036 mg/kg bw/day

- The minimum NO(A)EL, according to the above suggested calculations (SCCS/1564/15) for the pure maximum concentrated ingredient should be:

All MoS calculations of Table II take into account an oral bioavailability of 50% of an orally administered dose (systemically available).

Minimum NO(A)EL = MoS x SED / 2 = 100 \* 0.0036 / 2 = **0.18** extrapolated to **1 mg/Kg bw/day** and is satisfactory. (Acceptable minimum NO(A)EL <1000 mg/Kg bw/day)

**Conclusion:** It is unlike for the ingredients of the specific formula, without NO(A)EL values and total lack of safety reference, to present NO(A)EL values lower than the minimum NOA(E)L calculated according to the 'Worst Case Approach' and consequently, with present concentrations, to yield in MoS < 100.

The 'worst case approach' is in compliance with Annex I, point 8: "All significant toxicological routes of absorption shall be considered as well as the systemic effects and margin of safety (MoS) based on a no observed adverse effects level (NOAEL) shall be calculated. The absence of these considerations shall be duly justified."

Essential oil obtained by hydrodistillation from fresh leaves and dry buds of Syzgium caryophyllatum were analyzed by Gas Chromatography Mass Spectrometry (GC-MS). Thirty eight components were identified in the leaf oil. The main components were eugenol (74.3%), eucalyptol (5.8%), caryophyllene (3.85%) and a-cadinol (2.43%). Thirty one components were identified in bud oil with the main components being eugenol (49.7%), caryophyllene (18.9%), benzene,1-ethyl-3-nitro (11.1%) and benzoic acid,3-(1-methylethyl) (8.9%). The clove oil from Bangladesh was found to be comparable in terms of its eugenol content. |

## MING FAI INDUSTRIAL CO., LTD.

|  |  |  |  |   |
|--|--|--|--|---|
|  |  |  |  | <p><a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5116495/">https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5116495/</a> The present study aimed to investigate the <i>in vitro</i> mutagenic activity of <i>Origanum majorana</i> essential oil. The most abundant compounds identified by GC-MS were <math>\gamma</math>-terpinene (25.73%), <math>\alpha</math>-terpinene (17.35%), terpinen-4-ol (17.24%), and sabinene (10.8%). Mutagenicity was evaluated by the <i>Salmonella</i>/microsome test using the preincubation procedure on TA98, TA97a, TA100, TA102, and TA1535 <i>Salmonella typhimurium</i> strains, in the absence or in the presence of metabolic activation. Cytotoxicity was detected at concentrations higher than 0.04 <math>\mu</math>L/plate in the absence of S9 mix and higher than 0.08 <math>\mu</math>L/plate in the presence of S9 mix and no gene mutation increase was observed. For the <i>in vitro</i> mammalian cell micronucleus test, V79 Chinese hamster lung fibroblasts were used. Cytotoxicity was only observed at concentrations higher than or equal to 0.05 <math>\mu</math>g/mL. Moreover, when tested in noncytotoxic concentrations, <i>O. majorana</i> essential oil was not able to induce chromosome mutation. The results from this study therefore suggest that <i>O. majorana</i> essential oil is not mutagenic at the concentrations tested in the <i>Salmonella</i>/microsome and micronucleus assays.</p> <p><i>Sue Clarke BSc (Hons) PhD, in Essential Chemistry for Aromatherapy (Second Edition), 2008</i> Sweet marjoram is a pale yellow oil with a warm, camphoraceous and spicy odour. Its main components are alcohols terpinen-1-ol-4 (14-20%), thujan-4-ol (4-13%), linalool (2-10%), <math>\alpha</math>-terpineol (7-27%), hydrocarbon monoterpenes sabinene (2-10%) <math>\beta</math>-myrcene (1-9%), <math>\beta</math>-terpinolene (1-7%), <math>\alpha</math>-pinene (1-5%), <math>\alpha</math>-terpinene (6-8%), ester geranyl acetate (1-7%) and aldehyde citral (4-6%). Box 7.2 shows a GC analysis report. A versatile oil with many claimed therapeutic properties. Often called a comforting oil. Applied to the mind in situations of stress and grief where it calms and relaxes. For the body it is considered warming, analgesic, and antispasmodic suitable for muscle and joint pains. Also acting on the respiratory system for asthma and bronchitis, on the digestive system as a carmative relieving cholics and constipation and in skincare for bruising and chilblains. Considered a safe nontoxic, nonirritating and nonsensitizing essential oil but should be avoided during pregnancy.</p> <p><a href="https://www.researchgate.net/publication/319135048_Study_of_the_toxicity_of_essential_oils_of_Origanum_majorana_on_Tribolium_castaneum_and_Plodia_interpunctella_stored_product_insects">https://www.researchgate.net/publication/319135048_Study_of_the_toxicity_of_essential_oils_of_Origanum_majorana_on_Tribolium_castaneum_and_Plodia_interpunctella_stored_product_insects</a><br/><a href="http://www.ema.europa.eu/docs/en_GB/document_library/Herbal_-_HMPC_assessment_report/2016/02/WC500201949.pdf">http://www.ema.europa.eu/docs/en_GB/document_library/Herbal_-_HMPC_assessment_report/2016/02/WC500201949.pdf</a>.</p> <p>Results from relevant experimental studies on <i>O.</i></p> |

### ALLERGEN FACTORS:

- Allergens in the final product (determined by analysis): (An allergen is declared on the label when its concentration in the final preparation is >0.01%)

*No data available*

- Allergens from the perfume (SYMRISE / 881676 RELAX IN STYLE) and the raw material BONTOUX / EO BLEND - FIRE 1SQ 00107/ 1VC 07003:

|   |                 |
|---|-----------------|
| Allergens > 0.01% - to be declared on the labelling - they comply | % w/w           |
| <i>Limonene</i>   | <b>0.012845</b> |

Allergens >0.1%:

*None*

The SCCS is of the opinion that for substances identified as posing a high risk to the consumer and for which no individual thresholds could be derived (Table 13-5), the general **threshold of 0.01%** would limit the problem of fragrance allergy in the consumer significantly (for this product: **Limonene**).

## PURE CONDITIONER 45ML

(CD1-1634)

# MING FAI INDUSTRIAL CO., LTD.

---

- There are no detailed data for all allergens existing in the perfume and the plant-derived raw materials (opinion 1459/11, Conclusions-question 1).
- The corrections regarding allergens must be performed as soon as the perfume and plant-derived raw materials manufacturers will supply the relevant data as well as the EC gives final guidelines on the subject.
- The product contains mixture of “**Methylchloroisothiazolinone - Methylisothiazolinone**”. Those substances are a subject of extensive discussion during past years, while SCCS has recently expressed very skeptical on its use:
  - Opinion SCCS/1521/13 & Revision of 27 March 2014, in terms of Sensitisation: «Current clinical data indicate that 100 ppm MI in cosmetic products is not safe for the consumer. For leave-on cosmetic products (including ‘wet wipes’), no safe concentrations of MI for induction of contact allergy or elicitation have been adequately demonstrated. For rinse-off cosmetic products, a concentration of 15 ppm (0.0015%) MI is considered safe for the consumer from the view of induction of contact allergy. However, no information is available on elicitation»; «There is no harmonised classification of MI as a skin sensitizer. The risk for skin sensitisation by MI is at least equivalent to that of other substances which have received a harmonised classification according to the CLP Regulation.»
  - EU REG. 1003/2014 of 18 September 2014, ANNEX V/39: mixture MCI:MI in the ratio 3:1 only allowed in rinse-off products max.0.0015%.
  - EU REG. 2017/1224 of 6 July 2017, ANNEX V/57: MI allowed max 0.0015% only in rinse-off products (*from 27 January 2018 only cosmetic products which comply with this Regulation shall be placed on the Union market - from 27 April 2018 only cosmetic products which comply with this Regulation shall be made available on the Union market*).

*Subnote:* The two entries (39, 57) are “mutually exclusive” - simultaneous use not allowed.

## 9. UNDESIRABLE EFFECTS AND SERIOUS UNDESIRABLE EFFECTS

---

Not known or reported.

## 10. INFORMATION ON THE COSMETIC PRODUCT

---

- Patch Test: Satisfactory (Non irritant - QACS Ltd).
- Other Tests: Four Heavy Metals test (QACS Ltd).
- Literature Data: Not Applicable.

---

---

**1. ASSESSMENT CONCLUSION**

---

The product is considered **safe\*** for human health when used under normal or reasonably foreseeable conditions of use.

**2. LABELLED WARNINGS AND INSTRUCTIONS OF USE**

---

- Producer's data have been reviewed.
- The container and packaging of the cosmetic product must bear all the necessary information in indelible, easily legible and visible lettering according to Article 19 of the Regulation (EC) No 1223/2009 (e.g. date of minimum durability).
- The presentation of the cosmetic product and in particular its form, odour, colour, appearance, packaging, labelling, volume or size does not endanger health and safety of consumers due to confusion with foodstuffs, in accordance with Council Directive 87/357/EEC of 25 June 1987 on the approximation of the laws of the Member States concerning products which, appearing to be other than they are, endanger the health or safety of consumers.
- All ingredients referred in the formula and the MSDS of the raw materials should be written on the label with their correct INCI names in descending order (see Table II). Ingredients in concentrations of less than 1 % may be listed in any order after those in concentrations of more than 1 %. The labelling must follow Article 19 of regulation 1223/2009.

**\*SUGGESTIONS:**

- **Product function & Instructions of safe use** (e.g. "rinse hair well after product application" - also the time in minutes that the product has to be left on the hair before rinsing off should be indicated on the label) are advised to be added on the product label for the prevention of product misuse by the consumer (e.g. using the product as leave-on).
- According to the Regulation (EC) No 1223/2009 only cosmetic products for which a legal or natural person is designated within the Community as 'responsible person' shall be placed on the market. For each cosmetic product placed on the market, the responsible person shall ensure compliance with the relevant obligations set out in this Regulation. Cosmetic products shall be made available on the EU market only where the container and packaging of cosmetic products bear **the name or registered name and the address of the responsible person** in indelible, easily legible and visible lettering. If several addresses are indicated, the one where the responsible person makes readily available the product information file shall be highlighted.

## PURE CONDITIONER 45ML

(CD1-1634)

# MING FAI INDUSTRIAL CO., LTD.

---

**N.B.:** The ingredients Isopropyl Alcohol, Sodium Acetate and Cellulose may be contained in the product at low concentrations (as impurities found in the raw materials used in the formula). In case those substance are not considered as technically unavoidable impurities from the raw materials producers, they must be added in the ingredient listing on the labelling of the product, *especially if their concentrations in the final preparation are above the detection limit.*

**N.B.:** Because of the presence of 'Eucalyptol' & other contra indicated phyto-constituents from ess. oil use in the product, the addition of the warning phrase 'Not to be used for children under 3 years of age' on the labelling is recommended, although the expected concentrations would be expected to be low.

### Claim support:

- All claims on the label should be in compliance with Regulation (EU) 655/2013 and the guidelines to this Regulation.
- A Dermatological in vivo test (cutaneous irritancy test-patch test) has been performed with satisfactory results (Non Irritant - QACS Ltd). Based on these results the claim 'Dermatologically tested' can be referred on the label, even though the number of volunteers is not statistically significant.

**PURE CONDITIONER 45ML**  
(CD1-1634)  
**MING FAI INDUSTRIAL CO., LTD.**

---

---

### 3. REASONING

---

Taking under consideration

- The composition of the product
- The physicochemical properties of the raw material contained in the final product
- The manufacturing process of the product
- The microbial purity of the raw materials and final product.
- Impurities -Traces in the final product or substances
- Properties of packaging material
- The preservation efficacy of the final product.
- The chemical structure and toxicological properties of the raw materials
- Studies on human volunteers / relevant literature.
- The level of exposure of the consumer to the final product
- Data on documented undesirable effects to the product (no such data reported/available)
- Labelled warnings & instructions of use

Additionally the Product Manufacturer / Responsible person is aware of the following:

- All necessary measurements have been followed for the product to comply with the article 18 (Animal testing) of Regulation 1223/2009.
- All colouring agents whose number is preceded by the letter 'E' in accordance with the EEC Directive of 1962 concerning foodstuffs and purity criteria as set out in Commission Directive 95/45/EC (ANNEX IV)
- The Responsible person / Product manufacturer is responsible for the accuracy of primary information contained in the product dossier.
- For each cosmetic product placed on the market, the responsible person shall ensure compliance with the relevant obligations set out in the Articles 4 and 5 of Regulation 1223/2009.
- This safety assessment relates to the information received up until the date the assessment was performed.

**PURE CONDITIONER 45ML**  
(CD1-1634)  
**MING FAI INDUSTRIAL CO., LTD.**

---

All information provided by the technical dossier may be used, for any legal purpose within the EU, and according to the best current scientific knowledge, the product fulfils the requirements for safety for the consumers, under conditions of normal use, as long as data contained will be updated in accordance with the **SUGGESTIONS** (regarding safety) mentioned above and the guidelines of the current Regulation 1223/2009.

In the case that any complaint is communicated to the Responsible person and/or Product manufacturer or there are any alterations in the information regarding the product these should be also taken into the consideration of the signatory of this certificate.

|                               | Origanum Majorana Leaf Oil                      |             |
| Elettaria Cardamomum Seed Oil |   |             |

- 1 Put ingredient 1 into the emulsifying tank, then add ingredient 2 with stirring until completely transparent.
- 2 Add ingredient 3,4 with stirring 15 mins until completely dissolved, heat the batch to 80-85°C.
- 3 Add ingredient 5 with stirring until completely dissolved.
- 4 Slow down the mixing speed, cool down the batch to 42~38°C, add ingredient 6~8 with stirring until completely dissolved.
- 5 Add ingredient 9,10 with stirring until completely dissolved, take the sample for QC check.
- 6 After QC passed, then discharge into storage tank through filter for next step.

PURE CONDITIONER 45ML  
(CD1-1634)

MING FAI INDUSTRIAL CO., LTD.

PRODUCER'S GMP ISO 22716:2007 CERTIFICATE

*Certificate of Registration*

**Ming Fai Industrial (Shenzhen) Co., Ltd.**

Ming Fai Industrial Estate, Bainikeng, Pinghu, Longgang District, Shenzhen City, Guangdong Province, China

This is to certify that the below Scope of the captioned facility has been assessed by Intertek and found to be in compliance with the requirement of GMPC with reference to: **ISO22716:2007(E) COSMETICS - GUIDELINES ON GOOD MANUFACTURING PRACTICES**

*Scope of Registration*

Manufacturing of Shampoo, Hair Conditioner, Hair Styling Spray and Hair Styling Gel

Manufacturing of Toner, Mouthwash and Shaving Cream

Manufacturing of Body Butter, Body Cream, Body Lotion, Body Scrub, Body Mist, Screenshot Lotion, Deodorant, Shower Gel and Soap

*Helen Xue*

**Helen Xue**  
General Manager  
Chemicals & Pharmaceuticals

Date of Issue: Dec 11, 2015  
Date of Renewal: Jul 26, 2018  
Certification Number: SZ1507C2

*Authorized by*

*Certification Administration Centre*  
*Intertek Testing Services*

This certificate is valid as long as it bears a proper and authentic Intertek's Laser Logo dedicated for the year of initial certification and after satisfactory annual surveillance.

**Intertek**

The approval is subject to the organization maintaining the system in accordance with Intertek's rules and regulations for certification. Current status and details of the assessment result are updated on the website <http://intertek.com.cn/certification>.
