

SAFETY ASSESSMENT

According to EC Regulation 1223/2009

ONE LIFE CONDITIONING SHAMPOO 30ML

Formula Ref.: SH1-2396

MING FAI INDUSTRIAL CO., LTD.

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

SAFETY EVALUATION OF FINISHED COSMETIC PRODUCT
ACCORDING TO
ANNEX I OF (EC) REGULATION 1223/2009

INDEX

PART A- Cosmetic product safety information.....	3
1. Quantitative and qualitative composition of the cosmetic product	3
2. Physical/chemical characteristics and stability of the cosmetic product.....	5
3. Microbiological quality.....	5
4. Impurities, traces, information about the packaging material	5
5. Normal and reasonably foreseeable use.....	6
6. Exposure to the cosmetic product.....	6
7. Exposure to the substances.....	6
8. Toxicological profile of the substances	6
9. Undesirable effects and serious undesirable effects	13
10. Information on the cosmetic product	13
PART B- Cosmetic product safety assessment.....	14
1. Assessment conclusion	15
2. Labelled warnings and instructions of use	15
3. Reasoning	17
4. Assessor's credentials and approval of part B.....	18

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

PART A- COSMETIC PRODUCT SAFETY INFORMATION

1. QUANTITATIVE AND QUALITATIVE COMPOSITION OF THE COSMETIC PRODUCT

Product Name: ONE LIFE CONDITIONING SHAMPOO 30ML
Manufacturer Ming Fai Enterprise International Co., Ltd.
STUDY PERIOD January 2018
QACS LAB ID 17 06 01010
Product Category SHAMPOO (HAIR CARE)

TABLE I. FORMULA PROVIDED

RAW MATERIAL TRADE NAME	INCI	CAS No. *	%	FUNCTION
-	AQUA	7732-18-5	81.07794800	SOLVENT
AES 270N	SODIUM LAURETH SULFATE	68891-38-3	9.00000000	CLEANSING, EMULSIFYING, FOAMING, SURFACTANT
	AQUA	7732-18-5		SOLVENT
TC-CAB 35	COCAMIDOPROPYL BETAINE	61789-40-0	5.00000000	ANTISTATIC, CLEANSING, FOAM BOOSTING, HAIR CONDITIONING, SURFACTANT, VISCOSITY CONTROLLING
	AQUA	7732-18-5		SOLVENT
SODIUM CHLORIDE	SODIUM CHLORIDE	7647-14-5	2.32000000	BULKING, MASKING, VISCOSITY CONTROLLING
HI-FOAM 850	COCAMIDE MEA	68140-00-1	1.00000000	EMULSIFYING, EMULSION STABILISING, FOAM BOOSTING, SURFACTANT, VISCOSITY CONTROLLING
PALMERA REFINED GLYCERINE USP 99.5% LIQUID	GLYCERIN	56-81-5	1.00000000	DENATURANT, HAIR CONDITIONING, HUMECTANT, PERFUMING, SKIN PROTECTING, VISCOSITY CONTROLLING
RHEOSOL Q7P	POLYQUATERNIUM-7	26590-05-06	0.25000000	ANTISTATIC, FILM FORMING
	AQUA	7732-18-5		SOLVENT
HAPPYCREATIONS FRAGRANCES CO., LTD / BT306392	PARFUM	N/A	0.25000000	DEODORANT, MASKING, PERFUMING
VERSENE™ 220 CRYSTALS CHELATING AGENT	TETRASODIUM EDTA	64-02-8	0.05000000	CHELATING

Note: * The CAS No. mentioned in the provided formula and the documents of the raw materials were entered in the table above. The marked CAS No. (**) do not correspond with the CAS No. assigned to the specific ingredients in CosIng. For the cases that the CAS No. are not mentioned in the provided formula/documents or they do not match with the ones assigned to those ingredients in CosIng, the latter - where available - have been entered in the table above (CAS No. in brackets).

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

2. PHYSICAL/CHEMICAL CHARACTERISTICS AND STABILITY OF THE COSMETIC PRODUCT

- Supplier's specifications for each raw material have been reviewed (Safety and Technical Data Sheets, MSDS and TDS).
- Specifications of Final Product: Have been reviewed.

Appearance:	Transparent Viscous Liquid
Color:	Light Green
Odor:	Characteristic
pH:	5.50 - 6.50 (25 °C)
Viscosity:	3000 - 5000 mPa·s (25 °C, LVT#4@30RPM)

- Stability of The Product: Has been reviewed (manufacturer).

3. MICROBIOLOGICAL QUALITY

Microbiological Quality: The product, due to the presence of preservatives in the formula (e.g. Methylchloroisothiazolinone and Methylisothiazolinone) is unlikely to present, under normal production conditions, any kind of bio burden.

Challenge Test: The test has been performed (QACS Ltd.) according to the current EUROPEAN PHARMACOPUEIA.

Each strain mentioned below, has been studied separately: Ps. Aeruginosa ATCC 9027, St. Aureus ATCC 6538, E. Coli ATCC 8739, C. Albicans ATCC 10231, A. Brasiliensis ATCC 16404.

Results are satisfactory.

4. IMPURITIES, TRACES, INFORMATION ABOUT THE PACKAGING MATERIAL

- Regarding any traces and impurities from the raw materials please refer to Table I of section 1 Quantitative and qualitative composition of the cosmetic product and section 8. Toxicological Profile of the Substances.
- Properties of Packaging Material: According to the presentation and the formula of the product, package is considered unlikely to affect its purity and stability.

Type of packaging materials: Bottle: PET (EastPET™ A12)*. Cap: PP.

* The manufacturer of the PET material declares that that material is suitable for food contact applications.

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

- Production Method: Has been reviewed.
- G.M.P. Compliance:
Certification Body: INTERTEK. Certification Number: SZ1507C2 - Date of Issue: Dec 11, 2015. Date of Renewal: July 26, 2018.

5. NORMAL AND REASONABLY FORESEEABLE USE

The product is applied on the hair and it is rinsed off. External use only.

6. EXPOSURE TO THE COSMETIC PRODUCT

The product is applied on the hair and it is rinsed off so taking under consideration the SCCS/1564/15 opinion it can be studied toxicologically as a shampoo (hair care) with an estimated daily amount applied 10.46 g and a calculated relative daily exposure 1.51 mg/Kg bw/day.

Target Group for Use: Adults

7. EXPOSURE TO THE SUBSTANCES

Please refer to Table I of section 1. 1. Quantitative and qualitative composition of the cosmetic product

8. TOXICOLOGICAL PROFILE OF THE SUBSTANCES

- The product itself has not been tested on animals (Article 18).

MSDS TOXICOLOGICAL REVIEW:

- Respiratory** : Not required for consumer use of this product. Inhalation exposure is not applicable for this type of product.
- Skin** : This product is unlikely to be sensitizing to human skin. It is not expected to produce allergy by skin contact, except the cases of people with known allergic reaction in the specific allergens referred on the label. The absorption through the skin is considered limited.
- Eye** : As with any material contacting the eye its accidental exposure may result in slight eye irritation.
- Ingestion** : Although some ingredients used in the manufacture of this product are considered hazardous on an individual basis, the final formulation of this product is considered non-hazardous, under foreseeable use.

All information available refers to the relevant MSDS of each raw material that takes part in the formula of the product. The specific ingredients that have been chosen for the production of this product have been used for years, for same

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

products, without any known toxicity problems, under foreseeable conditions of use.

- Especially for 'hazardous' raw materials (substances under restrictions listed in the Annexes i.e. Annex II-Substances Prohibited in Cosmetic Products, Annex III-Substances Which Cosmetic Products Must Not Contain Except Subject to the Restrictions, Annex IV-Colorants Allowed, Annex V-Preservatives Allowed and Annex VI-UV Filters Allowed) there are already limits in legislation.
- There are no data for evaluation in the product of any impurities of the substances and raw material used.
- There is no evidence from the formula of the product for interaction of substances.
- It contains the permissible colorants **CI 19140**, **CI 42090** and **CI 14700** which are allowed for use in cosmetics in the EU according to the REGULATION (EC) No 1223/2009. The producer must ensure that every batch of those colorants used for the production of this product is in conformity with EU legislation. Cosmetic colorants must pass purity criteria as set out in Commission Directive 95/45/EC (and its subsequent legislative replacements) or specific purity criteria as set by REGULATION (EC) No 1223/2009 (see ANNEX IV - LIST OF COLORANTS ALLOWED IN COSMETIC PRODUCTS), where applicable.
- There are known plant-derived raw materials (e.g. extracts, oils, waxes, etc.) directly added in the formula.
- The product contains **polyacrylamides (Polyquaternium-7)** and, according to the Regulation (EC) No 1223/2009 and the SCCP opinion 0011/98, the maximum residual acrylamide content in the final product must be 0.5mg/kg. The manufacturer of the raw material suggests/guarantees that the maximum residual acrylamide content in the raw material is such so that the final product fulfils this restriction.
- Based on current Cosmetic legislation 1223/2009, MoS must be calculated for every ingredient according to the relevant NOAEL.

For ingredients without NO(A)EL values and total lack of safety reference, the calculation below is a '**worst case approach**', where, taking under consideration the pure maximum concentrated material of the formula, the minimum NO(A)EL (**oral**) is calculated, according to the Estimated daily exposure (A) of the product (§ 1.6).

In this way 'dangerous' ingredients are considered only those with 'hypothetical' NO(A)EL values lower than the minimum NO(A)EL calculated value and concentrations, even not greater than the pure maximum concentrated material, but able to result (under Safety calculation) in $MoS < 100$.

The combination above is statistically difficult to yield in $MoS < 100$ as:

1. The existence in calculations of the maximum concentrated material of the formula (without NOAEL), minimizes the possibilities of any other material to be so potent (in view of a NO(A)EL value),

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

2. In this approach the calculation of the minimum NO(A)EL, is usually lower than 1000 mg/Kg bw/day, depending on the type of the product. The minimum NO(A)EL values at these levels can be found only in ingredients like biocides/preservatives (i.e. Phenoxyethanol 500 mg/Kg bw/day or Methyl Paraben 1000 mg/Kg bw/day (SCCP/0125/99 & SCCP/0873/05 respectively).

3. Ingredients with low NO(A)EL values (<1000 mg/Kg bw/day) are very well defined in toxicological literature and there are exact data that have already been taken into consideration for calculation of the relevant MoS.

Calculation of the 'Worst Case Approach':

MoS= NO(A)EL / SED > 100, With:

SED (mg/kg bw/day) = Systemic Exposure Dosage

A (mg/kg bw/day) = Estimated daily exposure to a cosmetic product per kg body weight, based upon the amount applied and the frequency of application (**1.51**).

C (%) = the Concentration of the ingredient under study in the finished cosmetic product on the application site (here Parfum 0.25%),

DAp (%) = Dermal Absorption expressed as a percentage of the test dose assumed to be applied in real-life conditions (**100%**).

SED = A (mg/kg bw/day) x C (%) / 100 x DAp (%) / 100 = 1.51 x 0.25 / 100 x 1 = 0.0038 mg/kg bw/day

- The minimum NO(A)EL, according to the above suggested calculations (SCCS/1564/15) for the pure maximum concentrated ingredient should be:

All MoS calculations of Table II take into account an oral bioavailability of 50% of an orally administered dose (systemically available).

Minimum NO(A)EL = MoS x SED / 2 = 100 * 0.0038 / 2 = **0.19 extrapolated to 1 mg/Kg bw/day** and is satisfactory. (Acceptable minimum NO(A)EL <1000 mg/Kg bw/day)

Conclusion: It is unlike for the ingredients of the specific formula, without NO(A)EL values and total lack of safety reference, to present NO(A)EL values lower than the minimum NOA(E)L calculated according to the 'Worst Case Approach' and consequently, with present concentrations, to yield in MoS<100.

The 'worst case approach' is in compliance with Annex I, point 8: "All significant toxicological routes of absorption shall be considered as well as the systemic effects and margin of safety (MoS) based on a no observed adverse effects level (NOAEL) shall be calculated. The absence of these considerations shall be duly justified."

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

The following table includes the relevant available NOAEL and MoS calculated for each ingredient of the formula.

TABLE II.

INCI	% (max)	NOAEL (mg/Kg bw/day)	MoS (min)	NOAEL/SAFETY REFERENCE

PHENOXYETHANOL	0.00012	80 / 500 (DERMAL) - ANNEX V	>100 (ANNEX V)	Opinion 0125/99 and Danish Ministry of the Environment Survey of Chemical Substances in Consumer Products, No. 88, 2007 Safe for use max.1% as a preservative / http://ec.europa.eu/health/scientific_committees/consumer_safety/docs/sccs_o_195.pdf
CI 14700	0.000117	N/A	N/A	http://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfcfr/CFRSearch.cfm?CFRPart=74 Food additive RESTRICTED however in many countries/uses as E125 ANNEX IV/18 Colour Red Field of application 1 #note: when used as a substance in hair dye products it remains under ANNEX II/1341 Disodium 3-[(2,4-dimethyl-5-sulphonatophenyl)azo]-4-hydroxynaphthalene-1-sulphonate (Ponceaux SX; CI 14700) (CAS No 4548-53-2; EINECS 224-909-9)

ALLERGEN FACTORS:

- Allergens in the final product (determined by analysis): (An allergen is declared on the label when its concentration in the final preparation is >0.01%)

No data available

- Allergens from the perfume (HAPPYCREATIONS FRAGRANCES CO., LTD / BT306392) at concentration >0.01% in the final preparation:

None

- Allergens from plant-derived raw materials (extracts, oils, waxes, etc.) at concentration >0.01% in the final preparation:

No data presented for the plant-derived raw materials. However, allergens at concentration >0.01% in the final preparation are not expected from the specific plant-derived raw materials considering their low concentrations.

The SCCS is of the opinion that for substances identified as posing a high risk to the consumer and for which no individual thresholds could be derived (Table 13-5), the general threshold of 0.01% would limit the problem of fragrance allergy in the consumer significantly.

- There are no detailed data for all allergens existing in the perfume and the plant-derived raw materials (opinion 1459/11, Conclusions-question 1).

ONE LIFE CONDITIONING SHAMPOO 30ML

(SH1-2396)

MING FAI INDUSTRIAL CO., LTD.

- The corrections regarding allergens must be performed as soon as the perfume and plant-derived raw materials manufacturers will supply the relevant data as well as the EC gives final guidelines on the subject.

- The product contains mixture of “**Methylchloroisothiazolinone - Methylisothiazolinone**”. Those substances are a subject of extensive discussion during past years, while SCCS has recently expressed very skeptical on its use:

- Opinion SCCS/1521/13 & Revision of 27 March 2014, in terms of Sensitisation: «Current clinical data indicate that 100 ppm MI in cosmetic products is not safe for the consumer. For leave-on cosmetic products (including ‘wet wipes’), no safe concentrations of MI for induction of contact allergy or elicitation have been adequately demonstrated. For rinse-off cosmetic products, a concentration of 15 ppm (0.0015%) MI is considered safe for the consumer from the view of induction of contact allergy. However, no information is available on elicitation»; «There is no harmonised classification of MI as a skin sensitizer. The risk for skin sensitisation by MI is at least equivalent to that of other substances which have received a harmonised classification according to the CLP Regulation.»
- EU REG. 1003/2014 of 18 September 2014, ANNEX V/39: mixture MCI:MI in the ratio 3:1 only allowed in rinse-off products max.0.0015%.
- EU REG. 2017/1224 of 6 July 2017, ANNEX V/57: MI allowed max 0.0015% only in rinse-off products (*from 27 January 2018 only cosmetic products which comply with this Regulation shall be placed on the Union market - from 27 April 2018 only cosmetic products which comply with this Regulation shall be made available on the Union market*).

Subnote: The two entries (39, 57) are “mutually exclusive” - simultaneous use not allowed.

N.B.: Currently, Cocamide DEA is regulated in ANNEX III/60:

Maximum
concentration
in ready for
use
preparation

Maximum secondary amine content: 0.5%

Other

- Do not use with nitrosating systems
- Maximum secondary amine content: 5% (applies to raw materials)
- Maximum nitrosamine content: 50 microgram/kg
- Keep in nitrite-free containers

Despite the fact that here Cocamide MEA is being used, similar considerations and producer data with reference to the above specs, is advised to apply.

Data on absence of nitrosamines on final product is advised to be in place.

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

1. ASSESSMENT CONCLUSION

The product is considered **safe with restrictions** for human health when used under normal or reasonably foreseeable conditions of use.

In order the product to be characterized as safe all the suggestions (regarding safety) within the assessment should be met.

2. LABELLED WARNINGS AND INSTRUCTIONS OF USE

- Producer's data have been reviewed. There is no need for further instructions of the use as this is clear to the consumer from its presentation.
- The container and packaging of the cosmetic product must bear all the necessary information in indelible, easily legible and visible lettering according to Article 19 of the Regulation (EC) No 1223/2009 (e.g. date of minimum durability).
- The presentation of the cosmetic product and in particular its form, odour, colour, appearance, packaging, labelling, volume or size does not endanger health and safety of consumers due to confusion with foodstuffs, in accordance with Council Directive 87/357/EEC of 25 June 1987 on the approximation of the laws of the Member States concerning products which, appearing to be other than they are, endanger the health or safety of consumers.

SUGGESTIONS:

- All* ingredients referred in the formula and the MSDS of the raw materials should be written on the label with their correct INCI names in descending order (see Table II). Ingredients in concentrations of less than 1 % may be listed in any order after those in concentrations of more than 1 %. The labelling must follow Article 19 of regulation 1223/2009.
- *The ingredients Butylene Glycol and Phenoxyethanol are suggested to be added in the ingredient listing on the labelling of the product, *especially if their concentrations in the final preparation are above the detection limit.*
- According to the Regulation (EC) No 1223/2009 only cosmetic products for which a legal or natural person is designated within the Community as 'responsible person' shall be placed on the market. For each cosmetic product placed on the market, the responsible person shall ensure compliance with the relevant obligations set out in this Regulation. Cosmetic products shall be made available on the EU market only where the container and packaging of cosmetic products bear **the name or registered name and the address of the responsible person** in indelible, easily legible and visible lettering. If several addresses are indicated, the one where the responsible

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

person makes readily available the product information file shall be highlighted.

Claim support:

- All claims on the label should be in compliance with Regulation (EU) 655/2013 and the guidelines to this Regulation.
- A Dermatological in vivo test (cutaneous irritancy test-patch test) has been performed with satisfactory results (Non Irritant - QACS Ltd). Based on these results the claim 'Dermatologically tested' can be referred on the label, even though the number of volunteers is not statistically significant.

N.B.: The term/claim "ENHANCE" is advised to be further clarified.

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

3. REASONING

Taking under consideration

- The composition of the product
- The physicochemical properties of the raw material contained in the final product
- The manufacturing process of the product
- The microbial purity of the raw materials and final product.
- Impurities -Traces in the final product or substances
- Properties of packaging material
- The preservation efficacy of the final product.
- The chemical structure and toxicological properties of the raw materials
- Studies on human volunteers / relevant literature.
- The level of exposure of the consumer to the final product
- Data on documented undesirable effects to the product (no such data reported/available)
- Labelled warnings & instructions of use

Additionally the Product Manufacturer / Responsible person is aware of the following:

- All necessary measurements have been followed for the product to comply with the article 18 (Animal testing) of Regulation 1223/2009.
- All colouring agents whose number is preceded by the letter 'E' in accordance with the EEC Directive of 1962 concerning foodstuffs and purity criteria as set out in Commission Directive 95/45/EC (ANNEX IV)
- The Responsible person / Product manufacturer is responsible for the accuracy of primary information contained in the product dossier.
- For each cosmetic product placed on the market, the responsible person shall ensure compliance with the relevant obligations set out in the Articles 4 and 5 of Regulation 1223/2009.
- This safety assessment relates to the information received up until the date the assessment was performed.

ONE LIFE CONDITIONING SHAMPOO 30ML
(SH1-2396)
MING FAI INDUSTRIAL CO., LTD.

All information provided by the technical dossier may be used, for any legal purpose within the EU, and according to the best current scientific knowledge, the product fulfils the requirements for safety for the consumers, under conditions of normal use, as long as data contained will be updated in accordance with the **SUGGESTIONS** (regarding safety) mentioned above and the guidelines of the current Regulation 1223/2009.

In the case that any complaint is communicated to the Responsible person and/or Product manufacturer or there are any alterations in the information regarding the product these should be also taken into the consideration of the signatory of this certificate.
