Recycled Raw Materials

The majority of Faerch APET, CPET, MAPET® and MAPET® II packaging contains recycled PET (rPET) behind a functional barrier. All raw materials used in the manufacture of Faerch products, including recycled materials, are certified suitable for direct food contact. Faerch complies with functional barrier regulation, wherever national regulation legislates on the use of recycled plastic.

Recycled Content

Faerch is committed to full transparency when communicating recycled content, and has established third party auditing recycled PET (rPET) content on an annual basis. As recycled PET (rPET) content can fluctuate year to year, please contact your Compliance or Sales contact for the most up to date recycled PET (rPET) content figure for this recipe. For more information on why recycled content fluctuates year on year, or the ISO definitions of recycled PET (rPET), post-consumer content, and pre-consumer content, please see our documents “Recycled PET in Food Packaging” & “Recycled Content Declaration”

Storage

Items must be stored between 5 – 40°C and away from direct sunlight. Products containing carton/paper must be stored between 45-55% relative humidity. All items can be stored up to 5 years.
