- Hypoallergenic adhesive dressings
- Highly absorbent wound pad is covered with a non-adherent film to properly protect wound and ease removal
- Conforms to awkward body parts like elbows, the neck or the hip
- Non-woven construction
- Pack of 25 individually wrapped sterile dressings

The **HypaCover Adhesive Dressings** cushion and protect injuries, ideal for use on large cuts and grazes. They are supplied in a pack of 25 8.6cm x 6cm dressings. The dressing moulds around body contours and stays firmly in place even on awkward body parts, making these adhesive dressings a versatile solution when you need to provide first aid. The highly absorbent wound pad is covered with a non-adherent film to prevent breakage and reduce trauma when the dressing is removed. The non-woven design of the dressing helps to reduce the healing time. HypaCover dressings provide outstanding patient comfort and are ideal for wounds in sensitive or difficult to cover areas such as the neck, elbow or hip. All dressings are individually wrapped and sterile to reduce the risk of secondary infection.
