

Professional Induction

DPI300

The DPI300 is a precision warming induction plate. Perfect for the front of house environment, self-service buffet or simply providing the best presentation of your menu, adding to the experience of your customers. The DPI300 is designed to support chafing / serving dishes to keep your hot self-service buffet menu hot! The induction zone covers 280mm. At 4mm thick the glass plate will support up to 20Kg. The DPI300 control panel features 20 digital pre-set power levels for precise control. Along with all the models in our professional induction range the DPI300 is rated to run at full power for up to 8 hours without cutting out.

Features: 1.5Mtr cable to control panel; 20 pre-set digital control; digital timer; 4mm thick vitro ceramic glass plate. "daisy chain" connection up to 3 units in series.
