# BRAVILOR BONAMAT

Freshly ground coffee beans are the basis of delicious filter coffee. We at Bravilor Bonamat have ensured that the equipment is simple to use and to maintain. The Fresh brew series is a professional eye catcher thanks to its sleek design and backlight effects.

## Fresh brew: the taste of quality

- Five standard LED colours and the option to set one colour as desired
- Individual drink settings
- Little maintenance: automatic descaling and rinsing programme
- Unique hot water system: less susceptible to scale
- Descaling indicator
- Waste bin full indicator
- Sliding drip tray
- Total and day counters
- Selector button for cup, mug or (thermos) jug

## ■ FreshOne

The ultimate solution for a delicious fresh cup of filter coffee with only one press of the button: the FreshOne. Equipped with one large canister for fresh brew coffee and with a separate hot water outlet. The highly advanced machine meets your personal tastes by means of its variable coffee strength selection.

◀ The transparent canister with beans on top of the FreshGround increases the 'fresh coffee experience'.

## ■ FreshMore (XL)

Whether you choose a cup of fresh filter coffee or, for example, a delicious cappuccino, coffee with milk or Moccachino; the FreshMore offers a broad range of coffee varieties. Besides, you can also choose chocolate or hot water .

Supplemented by variable coffee strength selection and a selection button for adding milk, this machine is perfect for every location. The FreshMore has, apart from the canister for fresh brew coffee, models with two or three canisters for instant products. The XL version offers more or larger canisters for an even more extensive range of drinks and a selection button for adding sugar to your coffee.

## ■ FreshGround (XL)

Good coffee made from freshly ground beans at any time of the day. This model enhances the fresh coffee experience with its transparent canister filled with coffee beans on top of the machine and the grinder that grinds the beans for each individual cup. With more than 2.5 kilos of beans you can make lots of filter coffee. The FreshGround is able to serve you various coffee varieties, chocolate and hot water. The FreshGround creates the optimum coffee experience via its strength selection button for adding milk and other individual setting options.

The FreshGround offers the possibility of making use of instant products. The XL version offers more or larger canisters. This machine also has an extra selection button for adding sugar to your coffee.

◀ The adjustable LED backlight gives your fresh brew machine an even more personal touch. Adjust the atmosphere to your own liking.

◀ It is all about clarity: the place for the cup lights up after having selected the drink. A light signal indicates that the drink is ready.
