PANTHER Hot Cupboards

Quality built on experience

With a catering equipment manufacturing heritage that spans five decades, Lincat has built a reputation for quality and innovation. Our continued success both in the UK and overseas owes everything to a simple yet fundamental principle - we listen to our customers. As a result, we have developed an in-depth understanding of our customers' needs for reliability, consistency and efficiency.

To ensure we meet those needs we have invested heavily in the latest production techniques and a highly skilled product design and food application team. We source only the best quality materials and components. And we set ourselves the highest standards in the industry. All of which is reflected in well designed, superbly built products that combine innovative features with proven technology, backed by first class customer service and technical support.

PANTHER

Hot cupboards that cater for every need

Whether you serve relatively small numbers or hundreds of diners every day, catering is a demanding environment. And that demands equipment that is built for the challenge. Panther hot cupboards are not only designed to provide outstanding functionality and flexibility, they are manufactured by Lincat to the highest specifications. Robust, hygienic, and highly energy-efficient, Panther hot cupboards are the professionals' choice.

The Panther range is extensive. The 800 Series and the 670 Series are both available in various lengths. The 800 Series can accommodate between three and six standard 1/1 GN containers, whilst the 670 Series can hold as many as five. Incorporating great value-added features as standard such as digital temperature display and control, fan assisted heating and 1/1 GN compatible mirror stainless steel

interiors, both series offer a choice of plain or bain marie tops. You can also choose between static models with sturdy, adjustable legs or mobile units with castors and push bar. So whether you need to transport food, form a servery or create a kitchen pass, Panther offers the ideal solution.

In addition to the 800 and 670 Series, the Light Duty series comprises four static models that are ideal for holding food and warming plates.

From cafeterias to large restaurants, small care homes to hospitals, primary schools to colleges and universities, the Panther range of hot cupboards more than measures up to the task.

Unrivalled choice with capacity to match

Panther 800 Series hot cupboards combine attractive, practical, energy-saving design with the capacity and quality essential for holding and transporting food at the desired temperature in high volumes. This range comprises plain top and bain marie models at 800mm deep and 900mm high in a choice of four lengths. The bain marie versions can accommodate up to six 1/1 GN containers.

Features such as fan-assisted heating and accurate digital thermostatic control deliver exceptional energy-efficiency. And with a wide range of options including tray slides, corner bumpers, door locks plus an extensive range of overshelves, you can 'tailor' your 800 Series hot cupboards to suit your specific needs.

Ideal for large restaurants, hospitals, schools and cafeterias, Panther 800 Series hot cupboards are remarkably versatile. Supplied as mobile units (static versions optional), you can specify them as 'pass through' models with a set of sliding doors either side of the fully 1/1 GN compatible hot cupboard.

Robust, reliable and high capacity

All 800 Series models are available as pass through versions

Hot cupboard will accept 1/1GN containers

Accurate digital electronic temperature control as standard

Easily removable doors

Supplied with two heavy duty multi-section chrome plated shelves

Features

- Choice of static and mobile versions
 - Static - with sturdy, adjustable legs
 - Mobile - with a push bar and robust 100mm diameter heavy duty swivel and braked castors
- Fully 1/1GN compatible hot cupboard for operational efficiency
- Fan assisted hot cupboard provides even heat distribution, fast heat up and recovery times, and lower energy usage
- Supplied with two heavy duty multi-section chrome plated rod shelves capable of taking the heaviest loads
- Four shelf positions allow adjustment to meet individual needs
- Accurate digital electronic control of the hot cupboard temperature, adjustable between 20 and 99°C, ensures compliance with food hygiene regulations
- Double skinned construction provides efficient heat retention and a cool to touch exterior – safe and energy-efficient
- Removable doors and shelves allow access to the fully stainless steel interior for easy cleaning
- Easy-fit robust push bar supplied with mobile units can be fitted to either end of the hot cupboard
- Optional pass through models with removable sliding doors to both sides provide enhanced workflow efficiencies
- Streamlined design allows units to be suited together and sit flush against walls
- Multi-panel base construction provides extra rigidity

Convenient plating area

Upturned edge for easy removal of GN containers

Internal tap with tube for easy draining

A range of sizes and accessories gives unparalleled versatility

Bain marie models

- Units available to take 3,4,5 or 6 x 1/1 GN containers up to 150mm deep
- Thermostatically controlled bain marie top can be operated with wet or dry heat
- Convenient plating area
- Upturned rim of bain marie well allows easy removal of gastronorm containers
- Drain tap located inside hot cupboard allows fast and easy draining
- Easy to clean flat bottom tank of bain marie section

Adjustable leg option
All 800 Series models are available as static or mobile versions

Plain top models

- Sturdy stainless steel top – ideal for plating and garnishing and for use as a mobile workstation

Adjustable leg option
All 800 Series models are available as static or mobile versions

Flexibility and function above all

One of the many optional accessories available with Panther 800 Series hot cupboards, overshelves make a very useful and cost-effective addition.

There are no fewer than six 800 Series overshelf units to choose from for each hot cupboard. The range comprises single, double and triple tiered overshelves, each available as an ambient unit or fitted with quartz heat lamps, which are controlled independently of the hot cupboard itself.

Ideal for short-term holding of plated meals or for creating an efficient, high capacity kitchen pass, these sturdy overshelves not only look the part, they play their part in a professionally run kitchen. Panther overshelves – the perfect way to top off your 800 Series hot cupboards installation.

Single-tier overshelf

Two-tier overshelf

Three-tier overshelf

Quality and choice made even more accessible

At 670mm deep, Panther 670 Series hot cupboards are designed to fit through narrow doorways. This makes them ideal for pubs and smaller restaurants as well as nursing and care homes where plated meals are to be transported from the kitchen to the residents.

Although physically smaller than the 800 Series, the 670 Series is big on features and generous on capacity. The range offers a choice of bain marie or plain top units each in four different lengths standing 900mm high. Bain marie models can accommodate up to five 1/1 GN containers.

You'll save on energy costs too. The highly efficient Panther 670 Series achieves a 25% reduction in electricity usage compared with its predecessor.

Available as mobile or static units, all 670 hot cupboards are fan assisted and fully 1/1 GN compatible. Options include a choice of stylish gantries and different colours for the front panels.

Capable of holding 1/1GN containers

Internal tap with tube for easy draining

An array of optional accessories is available including stylish gantries and tray slides

Features

- Choice of static and mobile versions
 - Static - with sturdy, adjustable legs
 - Mobile - with a push bar and robust 100mm diameter heavy duty swivel and braked castors

Hygienic food service with style

All 670 Series hot cupboards are available with optional gantries, either as ambient units or fitted with quartz heat lamps to provide additional heat and illumination. Sleek and stylish, the curved profile incorporates a glass sneeze screen, helping you to maintain excellent standards of hygiene.

Perfectly suited for use in carveries and buffet operations, the 670 Series gantry not only protects food items in the bain marie, it can help protect your reputation too.

As well as supporting good practice in food service hygiene, the 670 Series gantries can make an attractive contribution to the quality of your food presentation and enhance its appeal.

670 Series Colour options

Be a shade more adventurous

Here's a striking way to transform the look of your 670 Series hot cupboards and brighten-up your food service area at the same time.

All 670 Series hot cupboards can be specified with the option of four different colours for the front panels. Choose from a warm radiant red, a fresh zestful yellow, a cool calming blue, or a relaxing natural green.

Brilliant for coordinating open kitchens with dining area colour schemes, creating a unique identity or energising the ambience of your establishment, these colour options are perfect for schools, colleges and any dining environment that dares to be a shade different.
