

PT

THE SPEED CLEAN.

It's versatile. Washes perfectly. And it's fast. The efficient passthrough dishwasher. The reliable kitchen workhorse.

KEY FEATURES

SIMPLE TO USE

An intuitive touch screen allows the user to change settings and offers a simple, single touch start.

Language-neutral icons help guide the user and also offers a guided self-cleaning programme.

SUITED TO YOU

Perfectly adapted to the space available to you and your dishes: the PT is available in sizes M, L and XL.

You can choose from four different variants: a dish, glass, bistro and cutlery washer. Each of these has up to three standard programmes as well as other individual setting options.

The PT also includes VarioPower. Allowing you to change the strength of the wash. A gentle wash for delicate items through to a more powerful wash for more robust, dirtier items.

ECONOMICAL AND EFFICIENT

Intelligent use of energy. Low water consumption. Perfect wash results. The PT Series combines first-class wash results with superior cost effectiveness and efficiency.

Waste water recovery: The PT Series includes EnergyLight waste water, heat recovery as standard: the heat exchanger uses the energy from the waste water to heat the cold inlet water. The advantage: you save on resources and energy costs are reduced by up to 10% per wash cycle.

OPTIONAL FEATURES

Water Treatment - Integral Softener (recommended in areas with hard water)

Connected Wash - Connects to an online digital network, so machine performance can be monitored, and problems can be fixed before they happen.

EnergyPlus Heat Recovery - Uses energy contained in steam and waste water to pre-heat inlet water

Twin Set - Two machines can be installed side by side and linked together to offer extra capacity during busy periods.

SUITABLE FOR

Pubs

Restaurants

Hotels

Central Production Kitchens

Schools, Colleges and Universities

Care Homes, Hospices and Hospitals

WHY CHOOSE WINTERHALTER?

We are the true warewashing specialists. We have the knowledge and expertise to deliver the perfect wash, whatever you're washing. It's all we do.

Our clever technology helps to give the best wash results, reduce operator downtime and can even help reduce the consumption of power and water.

WHY CHOOSE THE PASSTHROUGH?

This machine is all about reducing downtime to your business and cutting costs. We understand the impact of a machine going down, so this has been designed to cope with everything that is thrown at it. The combination of reliable, speedy wash results and efficiency make it the must-own passthrough for the commercial catering industry.

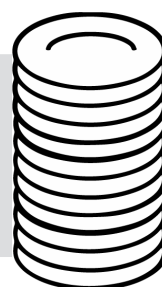

It's completely versatile too. The technology inside allows us to adapt the settings to suit the wash items, the water hardness, the ingredients on your menu, or even the language that your staff speak.

This machine will deliver years of top-quality wash results. This is an investment that will keep on giving.

RAPID WASHING SPEED

The PT can run a wash cycle in under 60 seconds. **A lot can happen in that time.** In fact, 1,389 people will order an Uber and there will be 3.8 million searches on Google. Or, you could read this sentence 4 times over.

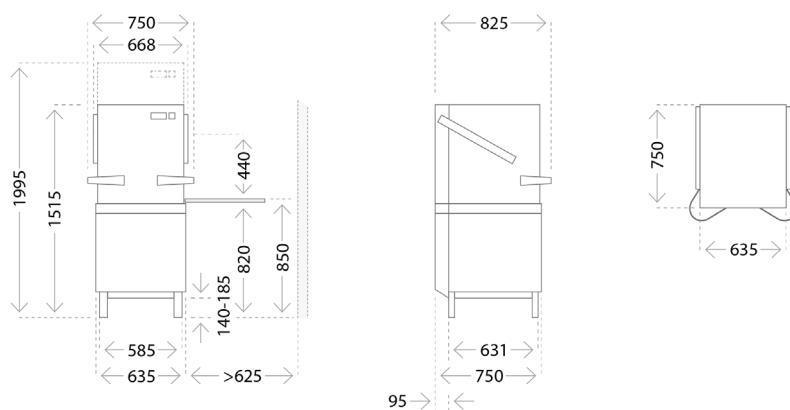

"I chose the Winterhalter machines because I've had one before and it was indestructible. It would go on forever and ever. They are just, I think, the Rolls Royce of dishwashers."
