

MORE SAFETY
MORE EFFICIENCY
CONNECTED WASH

THAT'S CONNECTED WASH.

In an increasingly networked world, Winterhalter boosts commercial warewashing to the next level: With CONNECTED WASH, the new generation of under counter, pass-through, and utensil warewashers is integrated into the network and enables the analysis and evaluation of all important operating data. This means that you can optimise the whole washing process and increase your operating security.

That means: From now on, you will be reminded that the detergent canister is empty. You will receive a message if the timespan between machine start-up and the first wash cycle is too long, incurring unnecessary costs. And if the machine reports a critical error, you automatically receive a push message on your smartphone or tablet. These are just a few examples of CONNECTED WASH's digital services. For the highest cleaning quality with the best possible efficiency.

Warewashers are connected via LAN or WLAN.

The wash cycle can be monitored and analysed from anywhere via an app.

The result: perfect wash results with the best possible efficiency.

THE ADVANTAGES OF CONNECTED WASH.

More Safety

Increase operational safety and keep downtimes to a minimum: with CONNECTED WASH, you have an overview of all important machine and operating data. And you can see straight away if something's not right.

More hygiene security

If the worst should happen: CONNECTED WASH documents all data in a warewasher log book. You have evidence of full compliance with all warewasher-relevant hygiene standards according to HACCP.

More efficiency

Optimise the washing process, reduce the operating costs: CONNECTED WASH shows you fail-safe ways you can improve your workflow – in which areas and with what measures.

More fleet management

Internal benchmarking: with CONNECTED WASH you have an overview of all your machines in different locations. You can exploit all your optimisation potential.

More control

Access to all important data irrespective of time and place: With the app from CONNECTED WASH, you or your service representative always stay informed of the current status of your machines. At any time, wherever you are. On your smart phone, tablet or computer.

More service

An all-rounder: CONNECTED WASH makes your washing process not just safer and more efficient, but also simpler and more practical. With useful and thoughtful service functions that are constantly being developed – right up to remote maintenance of your warewasher by our specialists.

Are you convinced by the advantages of CONNECTED WASH? But you still have questions or want an individual consultation? Then simply get in contact via www.connected-wash.com/contact
